## Election of the Species

This application contains claims directed to the following patentably distinct species of the claimed invention:

Species I, figures 1A-5B, relates to a dielectric resonator device having a conductor loop having first and second loop portions attached to a partitioning plate;

Species II, figures 10A-10C, relates to a dielectric resonator device having a conductor loop having first and second loop portions attached to a partitioning plate, and the wall of a cavity having projections and/or recesses for placing the partitioning plate;

Species III, figures 11A and 11B, relates to a dielectric resonator device having a conductor loop having first and second loop portions integrally formed with a partitioning plate;

Species IV, figures 12A and 12B, relates to a dielectric resonator device having a conductor loop having first and second loop portions attached to a partitioning plate, wherein the conductor loop forming an "S" shape in x axis;

Species V, figure 13, relates to a dielectric resonator device having a conductor loop having first and second loop portions attached to a partitioning plate wherein the conductor loop fixed to the top and bottom of a cavity;

Species VI, figures 14A-15B, relates to a dielectric resonator device having a conductor loop having first and second loop portions attached to a partitioning plate, wherein the conductor loop is an untwisted/circular loop;

Art Unit: 2817

Species VII, figure 16, relates to a dielectric resonator device having a conductor loop having first and second loop portions attached to a partitioning plate, wherein the both ends of the conductor loop are connected to the bottom of a cavity; and

Species VIII, figure 17, relates to a dielectric resonator device having a conductor loop having horizontal and vertical loop portions attached to a partitioning plate.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, none of the claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over

Art Unit: 2817

the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Seungsook Ham whose telephone number is (571) 272-2405. The examiner can normally be reached on Monday-Thursday, 8:00AM-5:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert Pascal can be reached on (571)-272-1769. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Art Unit: 2817

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
